SUMMARY

Software Engineer focused on Java/Spring Boot backend development, with hands-on experience building secure, high-throughput RESTful APIs backed by MySQL. Implemented role-based access controls with JWT authentication, optimized database queries for concurrent workloads, and delivered full-stack features with Angular. Deployed applications on AWS using EC2 and RDS. Strong foundation in Data Structures and Algorithms and Object-Oriented Design.

TECHNICAL SKILLS

Languages: Java, SQL, TypeScript, JavaScript

Backend & Frameworks: Spring Boot, Spring Security, Hibernate / JPA

Frontend: Angular, HTML5, CSS3

Database: MySQL (Relational Schema Design, Transactional Integrity)

Cloud & DevOps: AWS (EC2, S3, RDS), Git, GitHub, Docker, Maven, Postman

Core Competencies: Data Structures & Algorithms, OOP, REST API Design, JWT Authentication, Role-Based Access Control

PROJECTS

DriveShare (Group Project)

Spring Boot — Angular — AWS (EC2, S3, RDS) — Docker — MySQL — Spring Security

- Led a 3-person team building 18 REST API endpoints with Spring Boot / JPA for vehicle listing, reservations, and user management; enforced booking integrity via `@Transactional` to prevent double-booking under concurrent checkouts.
- Integrated AWS S3 for vehicle image uploads using pre-signed URLs; secured endpoints with stateless JWT authentication and role-based access control across 3 roles (USER, RENTER, ADMIN).
- Containerized services with Docker and deployed the full-stack application on AWS EC2 backed by a managed RDS (MySQL) instance.

High-Concurrency Ticket Booking Engine

Spring Boot — Angular — Redis — MySQL — AWS (EC2, S3, RDS) — Docker

- Engineered a high-throughput ticketing engine using Redis Lua scripts for atomic seat reservation, preventing overselling under simulated concurrent traffic.
- Designed a 10-minute cart-hold mechanism using Redis TTL and keyspace notifications to automatically release unpaid seats back to inventory.
- Built a responsive Angular seat-selection dashboard with PDF ticket generation persisted to AWS S3; containerized and deployed on AWS EC2 with managed RDS (MySQL).

EDUCATION

Ajeenkya D. Y. Patil University

B.Tech Computer Science and Engineering

Pune

2022 – 2026

CGPA: 8.32 / 10

CERTIFICATIONS

AWS Certified Cloud Practitioner – Amazon Web Services (Score: 914/1000)

Apr 2026

Full Stack Java with Angular – Symbiosis Digital Academy

Feb 2026 – Jun 2026
